CAREER ROADMAP · STATUS DATE NOV 3, 2026 · KEEBLER HEALTH IMPLEMENTATION MANAGER APPLICATION

Alex Barttrum: the project plan to go-live

I have led software rollouts from kickoff to go-live, and I work inside a practice on the EHR and claims data those rollouts depend on.

Proof of work: a working roster validator and pilot playbook
abarttrum.github.io/roadmap

WORKSTREAM	SHIPPED
Smart Wash LLC Founder / Owner	Built a service business from scratch to 30+ employees. Owned hiring, operations and the P&L.
Quinable Customer Success Manager	Cut churn 10% and raised customer lifetime value 15% by acting on at-risk patterns in account data.
Loeb.nyc Senior CSM	Owned retention and growth for complex B2B accounts, onboarding through renewal.
Scale Computing CS Implementation Manager	Led customer migrations, kickoff through go-live. Wrote the playbooks that made them repeatable.
Mind Mechanics Practice Manager, outpatient psych	Own the revenue cycle. Corrected a payer mix leadership was misreading; reconciliation found 12 missing remittances.
Benchmark Gensuite CSM, Enterprise SaaS	17 enterprise accounts, $2.2M ARR, the most of any CSM in the division, including its largest customer.
Keebler Health Implementation Manager	D1–30 Learn the platform, shadow pilots, find where intake stalls. D31–60 Own a pilot end to end. D61–90 Write the playbook for customer #2.

DEPRECATED

~~Doing it all myself~~
Now: SOPs and staff training

~~Trusting a field's label~~
Now: checking the source. One payer ID covered Medicaid and commercial

~~Reports only one person can explain~~
Now: reconciled to deposits across two banks

~~Finding out at renewal~~
Now: usage and risk findings to sponsors, with tradeoffs

BUILDING NOW

Daily Command Brief. EHR aging exports in, prioritized daily work queue out. Built with Claude Code.

AI agent designs for payer portal work and prior auth packaging, with reconciliation checks and human review.

AI vetting. Every tool checked for HIPAA and BAA coverage before practice use.

HOW KEEBLER FITS

Pilot to adoption	Scale migrations, kickoff to go-live
Rosters, file transport	Validator and intake checklist, attached
EHR data	Fixed EHR and clearinghouse gaps in Valant, Waystar
Clinician to executive	Trained clinical staff; briefed exec sponsors
Customer #2 easier	Scale playbooks; pilot playbook, attached
LLMs for capacity	Daily Command Brief; this packet

BUG-001 · OPEN · SEV: MEDIUM

No live attribution roster yet

Repro: search my resume for "attribution," "FHIR" or "HL7." 0 results.

Impact: I know EHR exports, claims and eligibility. Attribution logic is new to me, and this role depends on it.

Workaround: built the check first, with Claude Code, on made-up data:

```
$ roster_validator.py synthetic_roster.csv
44 rows · 13 errors · 2 warnings · HOLD
```

Fix: learn your spec in D1-30, run it live in D31-60.

Built with AI: this roadmap and its companion tools were built with Claude Code, with my review.
